

(THURSDAY)

7) Multiply: $(3x - 4)(x^2 + 12x + 16)$

8) Write the standard form of a circle with center $(5, -7)$ and radius of 4.

9) Find the center and radius of the equation below:

$$x^2 + y^2 + 8x - 10y - 2 = 0$$

Solve for x:

10)
